

# REVOLUTION!!!

As stated previously, **only a revolution of the whole working class, internationally united, will be able to overthrow capitalism.**

"Wait... but didn't half of Americans vote for Trump?!?! And aren't the majority of the ones that didn't liberals? Is our task to bring enlightenment to these fools?"

**No, class consciousness is something that naturally arises as material conditions under capitalism worsen. People are not fools, and they do not need us to enlighten them. There will eventually come a point when the workers of the world have no choices other than to revolt or to starve.**

It is the job of revolutionaries **to prepare for this time. It is not our job to instigate it.** Nor is it our job to fight the revolution for the class.

**While the desire for revolution is intuitive, acting as revolutionaries is not.** It entails understanding how the system works, **how to put an end to it, and most fundamentally what it means to put an end to it.**

**Such understanding can only be truly fostered within a revolutionary party of the class,** which is not separate from the class, but which comprises its most educated section.

# WHAT IS TO BE DONE?

If you've actually made it this far into our pamphlet and haven't just thrown it away, chances are you're already a relatively well educated and class conscious member of the working class.

We recommend reading the first three works on our reading list (Shocker). They are all relatively short and explain in sequentially more specific form what it is we believe.

We also recommend reaching out to us on our website, as we believe it is not only individual education that is important but collective organization.

What's written here may seem intimidating, but we promise we're just normal workers like you.

And remember...

Socialism or Barbarism  
Communism or Extinction  
**There is no third way!**

# DID I ACHIEVE ANYTHING BY GOING TO THIS PROTEST?

## Tucson Protest Achievement Checklist

- Chant led by PSL
- DSA Democratic Candidate Gives Pandering Speech
- Felt Good About Yourself
- Politely Ignored by Capital

**THE SONORAN  
INTERNATIONALISTS**

## REALITY CHECK

**Hundreds of thousands have died in a genocide**, centuries old rights once held sacred have been eroded, the world continues to do nothing about climate change, **we step closer to a third world war**, but **at least some people stood on a sidewalk** about it all.

## SO WHAT SHOULD I DO?

"Well the problem is obviously that the people in charge are bad guys that need to be replaced with good guys. So should I support the democrats?"

**No,**

**Everything that is happening today is an unavoidable consequence of capitalism.**

"Can we solve these problems by organizing the working class politically under our current system? Should I support the DSA?"

**No,**

**Everything that is happening today is an unavoidable consequence of capitalism.**

"So we need to use violent means outside the system to force concessions to the working class under capitalism? Should I join PSL?"

**No,**

**Everything that is happening today is an unavoidable consequence of capitalism.**

"I see, so you guys at the "Sonoran Internationalists" must have a better plan that I can follow to initiate the overthrow of capitalism!"

**No,**

**Only the whole of the working class united internationally as one can overthrow capitalism.**

"Okay, so what should we do until then, nothing?"

**Certainly Not!**

**But to understand what must be done, we must first understand what capitalism and socialism actually are. Action without complete understanding can be harmful. After all, one wouldn't pick up a firearm and start firing without learning basic safety.**

## WHAT IS CAPITALISM?

Capitalism is the system that we live under and which has existed everywhere across the Earth since the end of feudalism. **Its basis is the control of the means of production by a small class of owners, and the exploitation of the majority of humanity who must sell their labor to survive.**

**Capitalism is, however, not just businesses, but everything else that exists alongside them.** This includes the state, our cultural institutions, and even worker cooperatives.

**Everthing that is happening today is not a fluke of this system, but an unavoidable consequence of capitalism.**

## WHAT IS SOCIALISM?

Socialism (also known as communism) is a **political economic reality** in which **workers directly control their own means of production**, and in which they **directly control how decisions are made in the larger world**.

It's really that simple.

## WHAT IS SOCIALISM NOT?

- When the government under capitalism does stuff such as welfare programs, public power, or regulations (Sorry DSA!)
- Capitalist nations with red aesthetics like China or their allies (Sorry PSL!)
- Committing individual acts of terror under capitalism (Sorry CIA!)
- Mutual Aid or Charity Programs (Which are good, but not socialist)
- Anything else that doesn't actively build towards this reality. (Defined Above)

## OKAY... WELL THATS GREAT AND ALL BUT WHAT THE HELL SHOULD I DO IF THIS PROTEST WAS POINTLESS?
